

Introduction

Optical Express is fully committed to minimising our environmental impact across the scope of our business and through the services and systems we deliver to our patients and customers. Optical Express is fully committed to the principles of environmental sustainability through identifying and addressing the environmental aspects that result from and are associated with the business activities, products and services and for the communities in which the business operates.

Scope

The Policy applies to all employees (whether temporary, fixed-term or permanent), consultants, contractors, trainees, casual workers, agency staff, volunteers or any other persons associated with us.

Compliance

The purpose of this Policy is to ensure that all relevant activities, products and services of the organisation are identified and carried out in compliance with the relevant environmental legislation and other requirements including, but not limited to, Prevention of Pollution.

Reducing Environmental Impact

Optical Express strives to reduce the environmental impact of its business activities and improve environmental efficiency through Objectives, Targets, Systems and Programmes. This includes but is not limited to:

- Increasing the availability of sustainable services and solutions to our patients and customers;
- Maintaining plant and machinery to the highest standard to ensure a risk to the environment is minimised;
- Installing working systems that feature good environmental practice, which also allow for changing environmental conditions;
- Increasing the environmental efficiency of its business facilities to reduce the consumption of energy and other natural resources (e.g. water, waste).
- Complying with the relevant environmental standards and regulations as well as with legislative requirements;
- To act as industry/market leaders by achieving organic growth through a sustainable and responsible business model and by educating our employees, patients and customers.

To achieve these targets Optical Express operates an Environmental Management System and is committed to continual improvement of this system in order to enhance our environmental performance. The overall aim is for all areas of Optical Express to achieve International Standard 14001 although progress and maturity will vary within business areas and individual countries/regions. Where opportunities are identified, environmental initiatives may be extended to benefit the wider community.

Environmental Champions

Environmental Champions are in place across a range of business areas and regions. They will be the local point of contact for employees wishing to raise any concerns or suggest process improvements. The Environmental Champions will be responsible for driving Objectives, Targets, Systems and Programmes within their business area in addition to the relevant business area owners.

Policy Review

This policy is dated August 2019 and will be reviewed on at least an annual basis or as required to ensure it reflects current business requirements and incorporates all relevant legislation. We reserve the right to make such changes at any time. This is an official document and is uncontrolled when printed.
